

The commissioning of a LPFM would be very detrimental to the Moore community area. With the increase in violence, trouble in schools, and taking prayer and God out of everything that this country was founded on, leaves us with one good thing to stand on and for. And this is the radio station of K-Love in our local community. I donate to this radio station to provide a good holsome music that I am sure will be filled with value to my family and community and what we believe in. It is very difficult to find a radio station that is not filled with suggestions and implications that I do not want my children to be subjected to; therefore, I choose to listed to K-Love along with many other families in this area. By allowing LPFM, it would possibly remove a service that is being paid for locally and has a dramatic impact with our community. Several of the local families will get together and talk about the radio station and what is has provided for us. By public funding of this station, we feel we are providing a solid radio station for our community and provided an alternative to other choices. We are also winning people to Christ and bringing people to salvation. In todays time, that is important. Sine variety is the spice of life, K-Love should be able to provide its particular spice to everyones life if they so choose. Thank you
